About Me

UX research and design have shaped how I approach IT service design: by understanding the people, processes, and systems behind each service. I bring a human-centered perspective to improving service operations, refining queue and problem management, and aligning teams around clearer, more effective ways of working. My focus is on designing IT services that work better for both the people who deliver them and the people who rely on them.

IT SERVICE DESIGNER, NSWC CRANE, INDIANAPOLIS, IN – 2025-PRESENT

- Refined service queue and problem management processes to improve issue tracking, prioritization, and resolution across IT teams.
- Built organizational alignment and buy-in for process changes by engaging stakeholders, clarifying responsibilities, and connecting improvements to shared service goals.

UX DESIGN LEAD, NSWC CRANE, INDIANAPOLIS, IN – 2018-2025

- Built & led an 8-person UX team supporting multiple enterprise SaaS tools, increasing adoption by 24% via user research-driven improvements
- Developed and operationalized a unified research strategy across 3 internal teams, accelerating speed to insight and aligning UX research with business goals
- Established and scaled a centralized design system that promoted cross-team consistency and reduced design-to-dev rework by 27%

FOUNDER & CHIEF MARKETING SPECIALIST, OCS LLC, INDIANAPOLIS, IN – 2024-2026

- Launched a consultancy focused on optimizing UX research and digital strategy for small-to-midsize businesses
- Designed and implemented engagement workflows using self-service tools and automated scheduling
- Developed ominchannel user journeys by leveraging qualitative insights and analytics, enhancing customer experience and improving inbound lead flow by 13%
